

## **Course Syllabus**

The unit is separated into components. These are divided into a number of learning goals.

Each study goal starts with a prefix: knowing, understanding, calculating, or being able to apply.

These words show the various ability levels to be tested. Prefixed learning goals:

- The applicant has to remember information such as facts, regulations and concepts
- Understand the requirement for the applicant to demonstrate an understanding of a problem, fact, rule or principle
- be able to compute that it requires the candidate to be able to use formulas to calculate;
